Our Details:

Eprdv-engineering Co. & Ltd, Germany (www.eprdv-engineering.com) and Alhadbaa Modren Company, Iraq (www.alhadabaa.com) are seeking highly motivated: Solar Photovoltaic Installer to join our team. If you are interested to be a Solar Photovoltaic Installer or you are a Solar Photovoltaic Installer and are eager to become a skilled Solar Photovoltaic Installer by improving your skills and learning new ones, this is your chance to launch your career!

In addition to consistent work, top pay, and employment opportunities, we provide a benefits package that is among the best in the industry. Our comprehensive benefits encourage our employees and their families to build a lifelong relationship with us.

- Vacation Pay
- Health insurance
- Dental and vision plan
- Prescription drug plan
- Life insurance
- Short-term disability
- 401(k) profit-sharing savings plan
- Incentive programs
- Tool purchase programs

PV TRAINING CENTER

Center for Training and Rehabilitation of the Iraqi People for Photovoltaics (PV)

Simulators types:

- Solar Panel Installer Electrical
- Solar Technician
- Solar Photovoltaic installer
- Solar Site Technician
- Installer
- Installation Coordinator
- Forklift driver
- Heavy Equipment

We carry out customer-oriented projects in the field of Photovoltaics (PV) using the extensive features Simulation and the specific expertise of our staff.

Job Title: Solar Panel Installer Electrical - Apprentice

Location: Mosul, Iraq

Position summary:

As an Electrician Apprentice you will work directly under the supervision of a qualified Journeyman Electrician in the installation and repair of electrical systems, hydraulic, pneumatic and electronic components of industrial machinery and equipment.

In Germany our Training Program for Specific responsibilities includes:

- Helping install power supply wiring and conduit such as: EMT, O-CAL, Rigid conduit, MC cable, strut, cable trays
- Assisting with troubleshooting electrical components, wiring diagrams, transformers, motors, panels, and circuit
- Helping to install, maintain, and repair electrical systems such as: switch gears, motor controls, electrical panels, CT cabinets, conveyor systems, lighting, and power supplies
- Measuring, cutting, and bending wire and conduit, using measuring instruments and hand tools
- Tracing out short circuits in wiring, using test meter
- Examining electrical units for loose connections and broken insulation and tighten connections, using hand tools
- Constructing controllers and panels, using power drills, drill presses, taps, saws and punches
- Cleaning work area and washing parts
- Maintaining tools, vehicles, and equipment and keeping parts and supplies in order

Specific requirements:

- Ability to work well under the supervision of a Journeyman Electrician following electrical code manuals
- Eagerness to learn to comprehend schematic diagrams, blueprints and other specifications required by our client
- Experience working with hand tools, power tool and electronic test equipment
- Working knowledge of job site safety as well as ability to complete a company specific safety orientation
- High standard of integrity and professionalism

Job Title: Solar Photovoltaic installer

Location: Mosul, Iraq

Position Summary:

The Solar Photovoltaic Installer will assemble, install, or maintain solar Photovoltaic (PV) systems on power plants in compliance with site assessment and schematics. May include measuring, cutting, assembling, and bolting structural framing and solar modules. May perform minor electrical work such as current checks.

In Germany our Training Program for Essential Duties/Responsibilities includes:

- Install Photovoltaic (PV) systems in accordance with codes and standards using drawings, schematics, and instructions.
- Assemble solar modules, panels, or support structures, as specified.
- Apply weather sealing to array, building, or support mechanisms.
- Determine appropriate sizes, ratings, and locations for all system overcurrent devices, disconnect devices, grounding equipment, and surge suppression equipment.
- Install module array interconnect wiring, implementing measures to disable arrays during installation.
- Identify electrical, environmental, and safety hazards associated with Photovoltaic (PV) installations.
- Examine designs to determine current requirements for all parts of the Photovoltaic (PV) system electrical circuit.
- Check electrical installation for proper wiring, polarity, grounding, or integrity of terminations.
- Test operating voltages to ensure operation within acceptable limits for power conditioning equipment, such as inverters and controllers.
- Identify and resolve any deficiencies in Photovoltaic (PV) system installation or materials.
- Program, adjust, or configure inverters and controls for desired set points and operating modes.
- Visually inspect and test Photovoltaic (PV) modules or systems.
- Install required labels on solar system components and hardware.
- Determine materials, equipment, and installation sequences necessary to maximize installation efficiency.
- Perform routine Photovoltaic (PV) system maintenance on modules, arrays, batteries, power conditioning equipment, safety systems, structural systems, weather sealing, or balance of systems equipment.
- Activate Photovoltaic (PV) systems to verify system functionality and conformity to performance expectations.

Physical Requirements

- Ability to transport materials and equipment to complete assigned job tasks
- Ability to work safely in a branch/warehouse/rooftop environment
- Ability to operate office equipment including computers and determine accuracy of work
- Ability to interact with co-workers and participate in meetings
- Ability to work on rooftops with various angles and surfaces
- Ability to work in outdoor weather conditions

Job Title: Solar Technician

Location: Mosul, Iraq

Position Summary:

The Solar Technician is responsible for performing site surveys on upcoming projects and the preparation and completion of required inspections. The Solar Technician is an experienced member of the Technical Team and seen as a leader to help drive quality and efficiency to meet the Branch and company goals.

In Germany our Training Program for Responsibilities includes:

- Support Branch Manager with communication, feedback, and implementation of new procedures as it pertains to site survey and inspection tasks.
- Perform site audits on sold systems when applicable (take measurements, photographs, notes, and shading measurements of project sites)
- Responsible for scheduling, preparing (completing pre-inspection QA/QC checklist), and completing site inspections
- Communicate with the Construction Supervisor, and Engineering Team members to resolve any redline issues
- Meet with customers and discuss project details in order to accommodate their needs
- Prepare project documentation for construction teams
- Utilize software systems to record progress of various tasks
- Support branch admin team with organization as it pertains to site survey and inspection documentation

Requirements:

- High School diploma is required, college degree is preferred
- 2-5+ years of previous field construction experience preferred
- Must be a motivated team player, looking to succeed
- PV design or PV Electrical experience is preferred
- Excellent customer service skills
- Excellent verbal and written communication skills
- Excellent organizational and time management skills
- Professional appearance and interaction
- Strong computer skills
- Maintain valid Driver's License and must be able to travel to multiple sites throughout the da

Physical Requirements

- Support branch staff with administrative support, including organization and maintenance of project folders, uploads of pictures, completion of finished folders and some light administrative work

Requirements:

- 1+ years of previous field construction experience
- Must be a motivated team player, looking to succeed
- Experience with construction permitting is preferred
- High School diploma is required, college degree is preferred
- PV design or PV Electrical experience is preferred
- Experience with PV plan sets is preferred
- Excellent customer service skills
- Excellent verbal and written communication skills
- Excellent organizational and time management skills
- Professional appearance and interaction
- Strong computer skills
- Maintain valid Driver's License and must be able to travel to multiple sites throughout the day

Physical Demands:

- Ability to transport materials and equipment to complete assigned job tasks
- Ability to work safely in a branch/warehouse/rooftop environment
- Ability to operate office equipment including computers and determine accuracy of work
- Ability to interact with co-workers and participate in meetings
- Ability to work on rooftops with various angles and surfaces
- Ability to work in outdoor weather conditions

Job Title: Installer

Location: Mosul, Iraq

Position Summary:

Our Installers are integral members of our installation crews who work in a team environment installing solar arrays at residential customer's homes. Installers and their teams ensure accurate and timely solar installations, update Branch Managers on project and specifics, and utilize best installation and safety practices.

In Germany our Training Program for Responsibilities includes:

- Assembling the racking and solar array
- Assembly of equipment along with properly sealing all roof penetrations
- Trenching, concrete work and equipment assembly

Physical Demands:

- Ability to transport materials and equipment to complete assigned job tasks
- Ability to work safely in a branch/warehouse/rooftop environment
- Ability to operate office equipment including computers and determine accuracy of work
- Ability to interact with co-workers and participate in meetings
- Ability to work on rooftops with various angles and surfaces
- Ability to work in outdoor weather conditions

Job Title: Installation Coordinator

Location: Mosul, Iraq

Position Summary:

The Installation Coordinator is responsible for the communication and project organization from handoff from the support team to completion of installation. This position will assist with a variety of operational tasks within the Branch to ensure smooth operations.

In Germany our Training Program for Responsibilities includes:

- Manages install projects from scheduling through building permit signoff
- Manages construction schedule to fill it for maximum utilization
- Effectively communicates to Branch staff and stakeholders through our scheduling tools
- Ensure project management tools such as Workflow Management stay accurate and up to date
- Coordinate and schedule other trades, and utility as needed, in conjunction with the solar installation
- Maintain a basic understanding of utility, permitting & other external lead times

Communication:

- Provides exceptional service through setting proper expectations and reinforcement at every touch point of the installation project
- Provides quick response, seek project documentation as necessary to complete projects
- Log each milestone update and note in workflow management system
- Coordinate payments with members of your team
- Discuss feedback, ensure open issues addressed on every project
- Branch Operations Support
- May be responsible for document support on installation projects
- May provide support on Permit coordination through package preparation and project folder maintenance
- May assist in coordinating and maintaining meeting notes and cross-functional marketing when assigned

Requirements:

- High school diploma or equivalent; Bachelor's degree preferred
- 3-5 years of previous project administration or field construction experience
- Demonstrated customer service skills
- Strong verbal and written skills
- Excellent organizational and time management skills
- Detail-oriented and enjoys working in a fast-paced environment
- Strong computer skills including proficiency in MS Word, Excel, Outlook, and internet use, Oracle experience a plus
- Strong work ethic
- Ability to prioritize and complete a variety of simultaneous tasks with a high level of organization

Physical demands:

- Ability to perform normal office duties
- Ability to operate office equipment including computers and determine accuracy of work
- Ability to interact and participate in meeting
